Application Technical Data

PROPERTIES

Color: Gold Aqueous Liquid  
Application method: Spray is best but roll and brush can also be utilized as needed.  
Average weight/gallon: 9.1 lbs.  
Coverage area: 500 SQ. FT./GALLON  
Drying time: 20 minutes to 1 Hour  
Temperature limits: Freeze thaw stable.  
Safety: See Material Safety Data Sheet (MSDS) for product specific information.  
**DO NOT DILUTE**  
**STIR WELL BEFORE USE**

APPLICATION METHOD

1. Clean the surface to remove dust and other construction materials before spraying.  
2. Dry any noticeable water stains or similar thoroughly before application.  
3. Thoroughly mix MycoDyne™ using conventional paint mixing equipment or similar immediately before application.  
4. Use any good, quality spray equipment. An ideal solution is the Graco Ultra 395 or higher series with a fine finish tip such as the RAC-X FFT410 tip.  
5. IT IS IMPORTANT THAT A SEPARATE SPRAY SYSTEM OR CONTAINER BE USED FOR MYCODYNE™ TO ENSURE THAT THE SPRAYING OF OTHER MATERIALS IS NOT AFFECTED IN ANY WAY.  
6. Hold spray nozzle 12 – 18 inches from the surface and apply uniformly, overlapping each pass by to ensure coverage.  
7. Use a damp cloth to wipe excess areas before drying.  
8. Apply 1 coat only, no more is needed.  
9. **DO NOT MIX OR DILUTE** MycoDyne™ with other materials.
