Safety Data Sheet

Section 1: Identification

Product identifier

Product Name

• CertaSpray ® Polyurethane Foam CT10110-3; also includes CertaSpray ® X (CSX) Polyurethane Foam
• Product Literature Code: 30-50-050.

Relevant identified uses of the substance or mixture and uses advised against

Recommended use

• Cured polyurethane form

Details of the supplier of the safety data sheet

Manufacturer

• CertainTeed Corporation
  750 E. Swedesford Road
  P.O. Box 860 Valley Forge, PA 19482-0105
  United States
  www.certainteed.com
  Building.Solutions@saint-gobain.com

  Telephone (General) • 610-341-7000

Emergency telephone number

Manufacturer

• (800) 424-9300 - Chemtrec

Section 2: Hazard Identification

United States (US)
According to: OSHA 29 CFR 1910.1200 HCS

Classification of the substance or mixture

OSHA HCS 2012 • Not classified

Label elements

OSHA HCS 2012

Hazard statements

• No label elements(s) required

Other hazards

OSHA HCS 2012

• No hazards expected in normal conditions of use. Under United States Regulations (29 CFR 1910.1200 - Hazard Communication Standard) this product does not meet the criteria of a hazardous chemical.

Canada
According to: WHMIS

Classification of the substance or mixture

WHMIS • Not classified
Label elements

WHMIS

• No label element(s) required

Other hazards

WHMIS

• No hazards expected in normal conditions of use.
  In Canada, the product mentioned above is not considered hazardous under the Workplace Hazardous Materials Information System (WHMIS)

---

Section 3 - Composition/Information on Ingredients

Substances

• Material does not meet the criteria of a substance.

Section 4: First-Aid Measures

Description of first-aid measures

Inhalation

• Remove to fresh air. If breathing is difficult, give oxygen. If not breathing, give artificial respiration. Call a physician or poison control center.

Skin

• Rinse skin immediately with plenty of water for 15-20 minutes. Take off contaminated clothing. Wash contaminated clothing before reuse. Get medical attention immediately.
### Eye
- Flush eyes with water for at least 15 minutes while holding eyelids open. If easy to do, remove contact lenses, if worn. Get medical attention immediately.

### Ingestion
- Rinse mouth. Do not give anything by mouth to an unconscious person. Do not induce vomiting unless directed to do so by medical personnel. Get medical attention immediately.

### Most important symptoms and effects, both acute and delayed
- Refer to Section 11 - Toxicological Information.

### Indication of any immediate medical attention and special treatment needed
- All treatments should be based on observed signs and symptoms of distress in the patient. Consideration should be given to the possibility that overexposure to materials other than this product may have occurred.

### Section 5: Fire-Fighting Measures

#### Extinguishing media
- **Suitable Extinguishing Media**: In case of fire use media as appropriate for surrounding fire.
- **Unsuitable Extinguishing Media**: None known.

#### Special hazards arising from the substance or mixture
- **Unusual Fire and Explosion Hazards**: Containers may explode when heated. Runoff from fire control or dilution water may cause pollution.
- **Hazardous Combustion Products**: Upon decomposition, this product emits carbon monoxide, carbon dioxide, nitrogen oxide and/or low molecular weight hydrocarbons.

#### Advice for firefighters
- Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. Dike fire-control water for later disposal; do not scatter the material.

### Section 6 - Accidental Release Measures

#### Personal precautions, protective equipment and emergency procedures
- **Personal Precautions**: Ventilate enclosed areas. Do not walk through spilled material. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Do not breathe mist, vapors, or spray. Avoid contact with skin, eyes or clothing.

- **Emergency Procedures**: Eliminate all ignition sources. Stop leak if you can do it without risk. As an immediate precautionary measure, isolate spill or leak area for at least 50 meters (150 feet) in all directions. Ventilate closed spaces before entering. Stay upwind. Keep unauthorized personnel away. Keep out of low areas.

#### Environmental precautions
- Do not allow material or runoff to contact soil or enter waterways, drains and sewers. Water polluting material. May be harmful to the environment if released in large quantities. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil, or air).

#### Methods and material for containment and cleaning up
- **Containment/Clean-up Measures**: Move containers from spill area. Do not flush to sewer or allow to enter waterways. Contain and/or absorb spill with inert material (e.g. sand, vermiculite), then place in suitable container. Contaminated absorbent material may exhibit the same hazard(s) as the spilled product.
Section 7 - Handling and Storage

Precautions for safe handling

Handling

- Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Wear appropriate personal protective equipment, avoid direct contact. Do not breathe mist, vapors, or spray. Avoid contact with skin, eyes or clothing. Do not ingest. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Empty containers retain product residue and can be hazardous. Do not reuse container. Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Wash thoroughly with soap and water after handling and before eating, drinking, or using tobacco.

Conditions for safe storage, including any incompatibilities

Storage

- Keep container tightly closed. Keep only in the original container. Keep out of direct sunlight. Store in a cool, dry, well-ventilated place. Keep away from incompatible materials. Containers that have been opened must be carefully resealed and kept upright to prevent leakage.

Section 8 - Exposure Controls/Personal Protection

Control parameters

<table>

Exposure Control Notations

ACGIH

- Polyvinyl Chloride (9002-86-2): Carcinogens: (A4 - Not Classifiable as a Human Carcinogen)

Exposure Limits Supplemental

ACGIH

- Polyvinyl Chloride (9002-86-2): TLV Basis - Critical Effects: (lower respiratory tract irritation; pneumoconiosis; pulmonary function)

Exposure controls

Engineering Measures/ Controls

- Good general ventilation should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level.

Personal Protective Equipment

Respiratory

- When spraying/applying this product, approved MSHA/NIOSH positive-pressure, supplied air respiratory protection may be required depending on the adequacy of ventilation to maintain exposures below applicable exposure control limits. MSHA/NIOSH approved, air purifying respirators with organic vapor and HEPA (P100) cartridges, may be used for non-sensitized individuals when a cartridge change our schedule is in place in accordance with the OSHA Respiratory Protection Standard (29CFR 1910.134).

Eye/ Face

- Wear splash goggles.
Hands

• Chemical-resistant, impervious gloves should be worn at all times when handling this product.

Skin/Body

• Wear chemical resistant apron or full body suit.

Environmental Exposure Controls

• Avoid release to the environment. Controls should be engineered to prevent release to the environment, including procedures to prevent spills, atmospheric release and release to waterways. Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

Key to abbreviations

ACGIH = American Conference of Governmental Industrial Hygiene
NIOSH = National Institute of Occupational Safety and Health
OSHA = Occupational Safety and Health Administration
TLV = Threshold Limit Value determined by the American Conference of Governmental Industrial Hygienists (ACGIH)
TWA = Time-Weighted Averages are based on 8h/day, 40h/week exposures

Environmental

| Octanol/Water Partition coefficient | No data available |

Section 10: Stability and Reactivity

Reactivity

• No dangerous reaction known under conditions of normal use.

Chemical stability

• Stable under normal conditions of use.

Possibility of hazardous reactions

• Under normal conditions of storage and use, hazardous polymerization will not occur.

Conditions to avoid
Incompatible materials

- None specified.

Hazardous decomposition products

- Upon decomposition, this product emits carbon monoxide, carbon dioxide, nitrogen oxide and/or low molecular weight hydrocarbons.
