Garage Door Insulation Kit

Product Data Sheet

Description

Owens Corning's Garage Door Insulation Kit is a complete kit comprised of (8) durable R-8 fiberglass insulation panels with a tough, washable white vinyl facing. The kit comes with a unique fastening system that provides a quick and secure method to hold the panels in place. Each kit provides enough material to insulate a single car, garage door up to 9 feet wide.

Uses

The Garage Door Insulation Kit is designed for use on uninsulated metal garage doors. Each of the 8 panels in the kit are designed to cover up to a 22" by 54" opening and fit neatly into the exposed channel of the door.

Performance Properties

The Garage Door Insulation Kit contains R-8 rated insulation panels per ASTM C177.

- Flame spread of 45 per ASTM E84
- Smoke index of 30 per ASTM E84

*As compared to an uninsulated door.

** Percentage noise reduction is calculated based on differences in sound levels perceived across multiple frequency bands as measured in standard human listening studies.

Key Properties

As a result of its unique design and the construction and the nature of the base material, The Garage Door Insulation Kit offers some attractive benefits:

- 5 times better thermal performance*
- As much as 20% reduction in noise level**
- Brightens the space
- Installs in less than 1 hour (up to 9' door)
- Flexible material resists denting
- Big performance in a small package – 12" x 16" x 24"
- Cleanable vinyl surface (w/mild detergent)

Easy Installation

The Garage Door Insulation Kit can be installed in less than 1 hour. The only tools needed to complete the installation are a tape measure, utility knife, straight edge and a marker. Simply measure, mark, trim and install. Detailed instructions are on the side panel of the box.
