

ST1

SPRAY GUN

Increase your productivity, spray consistency, and uptime with Carlisle's ST1 Air Purge Spray Gun. This high-performance spray gun features ergonomics for increased comfort and control, quick change mix tips for precision and consistency, and an intuitive design for easy service.

INCREASED COMFORT AND CONTROL

Carlisle designed the ST1 Spray Gun to reduce sprayer fatigue and increase application consistency. The ST1 Spray gun is 10% lighter than the leading competition, allowing applicators to spray longer and more consistently, especially in hard-to-reach areas.

Carlisle's ST1 Spray Gun's handle features a wing design, transferring the load from your fingers to your arm and reducing fatigue. Additionally, the strap secures the gun to your hand to allow the applicator to rest fingers when not triggering.

PRECISE AND CONSISTENT SPRAYING

The ST1 Spray Gun features separate mix chambers and tips that can be mixed and matched to optimize flow and pattern width for every application. The quick and easy change of mix tips on the job allows applicators to seamlessly move from rapid coverage to precise application.

MODULAR DESIGN FOR QUICK AND INTUITIVE MAINTENANCE

Carlisle's ST1 Spray Gun is designed for simple maintenance by using a single tool, minimizing down time for applicators to continue spraying on the job.

The ST1 Spray gun is 10% lighter than the leading competition, allowing applicators to spray longer and more consistently.
