

NATURAL  
POLYMERS™

**ULTRA-PURE®**  
Spray Foam Insulation

# COMFORT CLEAN & SIMPLE

Using Ultra-Pure® spray foam doesn't mean compromising indoor air quality. Ultra-Pure® spray foam is designed to minimize odors<sup>1</sup> and VOC emissions before, during and after application. And because our FlexTemp™ formulas are designed to deliver the same performance year-round, you can expect smooth, inspection-ready results on every job. Ultra-Pure® spray foam with Odor Scavenger™ Technology is a high performance insulation designed to deliver dependable yield in the field and contributes to healthier indoor air quality.<sup>2</sup>

## SMOOTH, TACK-FREE FINISH

Ride the wave to a smooth, consistent surface for inspection-ready results

## FLEX-TEMP™ FORMULATIONS

Designed to deliver the same performance year-round

## ODOR SCAVENGER™ TECHNOLOGY

Contributes to healthier air—before, during and after application<sup>1</sup>

## BIO-BASED, LOW VOC<sup>1</sup> FORMULATIONS

GREENGUARD Gold Certified and Bio-Based Formulations

### Available In Open and Closed Cell Formulations

Ultra-Pure® low VOC<sup>1</sup> spray foam insulation comes in a 2.0 lb density closed-cell spray foam and a 0.50 lb density open-cell spray foam.

# HIGH PERFORMANCE LOW IMPACT

Our exclusive formulations and S.A.F.E.<sup>™</sup> educated technicians<sup>3</sup> enable builders to comply with demanding energy codes while helping to minimize off gassing<sup>1</sup> and protect indoor air quality.

# MORE SOLUTIONS HIGHER STANDARDS

Natural Polymers products give discerning builders and insulation contractors a solution they can feel confident about using and recommending for applications where spray foam is the right choice. Featuring innovative chemistry and a low-VOC product, Natural Polymers Ultra-Pure<sup>®</sup> spray foam products align with Owens Corning's rigorous standards for performance, safety and environmental impact.

## S.A.F.E.<sup>™</sup> EDUCATED INSTALLERS<sup>3</sup>

Ultra-Pure<sup>®</sup> contractors must complete our S.A.F.E.<sup>™</sup> (System Authorized Foam Engineer) education program. Following S.A.F.E.<sup>™</sup> protocols ensures Ultra-Pure<sup>®</sup> spray foam insulation is properly installed to facilitate quality control, product performance and indoor air quality.

### PRECISION

Smooth, consistent surface texture

### COMFORT

Advanced thermal performance

### SAFETY

Odor Scavenger<sup>™</sup> Technology contributes to healthier air<sup>2</sup>

### SUSTAINABILITY

Supports low impact building practices
